Reach to Recovery is a program that helps individuals cope with breast cancer through one-on-one peer support. It is offered at all points along the cancer continuum, from pre-diagnosis through the entire period when breast cancer remains a personal concern. The program pairs a breast cancer survivor with a recently diagnosed patient who has similar issues. Each volunteer is specially trained to help the patient express their feelings, verbalize her fears and concerns, and be an impartial sounding board for questions and matters that may be affecting them. Contact may be either a personal visit, a phone call, or online based on location. All volunteers are trained and certified by Reach to Recovery standards.

Primary Phone: (800)227-2345
Directions: Recently moved from 2433 Ridgepoint Dr

This program is provided by the American Cancer Society.

American Cancer Society - Texas
11000 North Mopac Exwy Ste 100
Austin, Texas 78759

American Cancer Society
